OC6 Iako Action Camera Mount

IM-250

Camera mount for 2.5" OC6 iakos — secured with lashing

WHAT'S INCLUDED

- 1x IM-250 Iako Mount
- 1x Knob & Nut for camera mount

WHAT YOU'LL NEED

- Your OC6 iako (2.5" / ~64mm diameter)
- Your GoPro or compatible camera
- Lashing material (not included) — we recommend cut bicycle inner tube strips, free from most bike shops

INSTALLATION

Inspect your lashing material before each use.

1. Seat the mount's arch against your iako at your desired position, with the GoPro mount facing away from the iako (up/outward, on the opposite side from the arch).
2. Lash the mount to the iako, wrapping both sides of the mount tight with no gaps. Finish with a tucked loop or girth-hitch — avoid knots that can vibrate loose.
3. Attach your camera to the GoPro-compatible mount interface.
4. Give the camera a firm shake to confirm the entire mount is seated securely before paddling.
5. When finished, rinse the entire mount with fresh water.

⚠ IMPORTANT

1. Designed for 2.5" OC6 iakos. Use on undersized or oversized iakos may result in inadequate grip.
2. Inspect your lashing before every paddle. Rubber degrades with UV and salt exposure over time — replace at the first sign of cracking or lost elasticity.
3. We strongly recommend using the CLK Camera Leash Kit (sold separately) as a secondary retention system.

CARE

Rinse with fresh water after use. Do not use solvents or abrasive cleaners on the mount.

DISCLAIMER

By purchasing and using this product, the user assumes all risk associated with its installation and use. SEAT6 is not liable for loss of or damage to any property, equipment, or persons resulting from improper installation, overloading, misuse, or use outside these instructions.
