

Rectangular Iako Lash Mount

IM-275-L

Lashing mount for 70mm rectangular wood iakos

WHAT'S INCLUDED

- 1x IM-275-L Iako Mount with swivel head
- 1x Knob & Nut
- Neoprene Padding (pre-applied)

WHAT YOU'LL NEED

- Your rectangular wood iako (~70mm / ~2.75" width)
- Your GoPro or compatible camera
- Lashing material

INSTALLATION

Inspect your lashing material, mount, and padding before each use. Check the mount and neoprene pad for cracks, wear, or damage. Do not use if anything looks compromised.

1. Seat the mount's notch flush against a flat side of your iako at your desired position, with the camera mount facing away from the iako.
2. Lash the mount to the iako, wrapping both sides of the mount tight with no gaps. Finish with a tucked loop or girth-hitch.
3. Attach your camera to the GoPro-compatible mount interface and tighten the knob.
4. Give the camera a firm shake to confirm the entire assembly is seated securely before paddling.
5. When finished, rinse the entire mount with fresh water.

⚠ IMPORTANT

1. Designed for rectangular iakos ~70mm/2.75" wide.
2. Inspect your lashing before every paddle, replace at the first sign of cracking, tears, or lost elasticity..
3. We strongly recommend using the CLK Camera Leash Kit (sold separately) as a secondary retention system.

CARE

Rinse with fresh water after use. Do not use solvents or abrasive cleaners on the mount.

DISCLAIMER

By purchasing and using this product, the user assumes all risk associated with its installation and use. SEAT6 is not liable for loss of or damage to any property, equipment, or persons resulting from improper installation, overloading, misuse, or use outside these instructions.
